

Hobart's legendary "A" Series mixer

This compact mixer is space saving and streamlined in design, with new blended metallic paintwork. Manufactured in either bench or floor mounted models with a 20 liters bowl capacity. The A200 comes complete with timer, stainless steel bowl, beater whip and hook and runs on a single or three phase motor.

A selected range of attachments and accessories can convert the A200 from a 20 liters capacity to a robust and efficient 10 liters mixer.

One of the optional accessories is a floor mounted stand, either static or mobile.
